

Moore[®]

FANS

CLASS 10000 EXTENDED CHORD (EC) FIBER REINFORCED PLASTIC (FRP)

The Class 10,000 EC FRP combines not only the strength of the aluminum hub & corrosion resistance of the FRP blade, but is designed with Moore's resiliently mounted blades. Resiliently mounted blades allows the fan to withstand the vibrations and loads induced by the structure or the environment. This will extend the life of your drive system and avoid costly repairs.

The result is a fan option that not only considers each part of the fan when battling corrosion but a fan that will last in the toughest environments.

FRP KEY FEATURES

DIAMETERS 5 TO 18 FEET
RESILIENTLY MOUNTED BLADES
UV RESISTANT

LIGHTWEIGHT ALUMINUM HUB
EASY INSTALLATION
CORROSION RESISTANT
